**MASTER’S ADVICE**

488 ACRYLIC FILLING PRIMER OPTIMAL HS 5+1
488 ACRYLGRUNDIERUNG OPTIMAL HS 5+1

- Maximal coating thickness is up to **100-120 microns** when applying in two layers
- Optimal quality of application can be achieved with adding **15-30%** of thinner
  No orange skin effect and coating imperfection such as blistering will occur
- When **30-40%** of thinner is added, application has to be carried out according to wet on-wet method in one layer
- **Up to 20%** thinner can be added
- **Easy to sand, even after a long period**
- Provides a high anti-corrosive protection
- Spot repairs can be carried out without the filler sinking or the build up of edges
