New fiberglass light putty is a new product with unique characteristics:
- It weighs almost half of ordinary putty and this helps to avoid extra weight on the repaired part.
- Because of its unique fillers, it does not create pores.
- It is easy to sand, it has high elasticity and excellent adhesive properties to different materials.
- Can be easily sanded down to zero.
- No need for additional fine putty application, can directly be overcoated with filler primer.
- Light green colour.
